WASHINGTON STATE DEPARTMENT OF AGRICULTURE
P.O. Box 42560, Olympia, Washington 98504-2560

Collection sites near Ellensburg, Yakima, Toppenish, Prosser **Sign up by March 8 for free disposal at the Yakima Watershed Pesticide Round-Up**

OLYMPIA — Residents, farmers, business owners and public agencies can safely dispose of old or unusable agricultural and commercial grade pesticides without paying any hazardous waste disposal fees. The state Department of Agriculture (WSDA), in cooperation with local agencies and businesses, will host collection events April 19-22 in the Kittitas and Yakima valleys. The Yakima Watershed Pesticide Round-Up includes collection events near Ellensburg on April 19, Yakima on April 20, Toppenish on April 21, and Prosser on April 22. To participate, you must sign up by March 8.

Because walk-in customers cannot be served, only those who sign up by March 8 will receive directions to the site, hours of operation, and needed transportation documents. To sign up, call (360) 902-2056, toll free (877) 301-4555 or send e-mail to wastepesticide@agr.wa.gov.

WSDA is sponsoring the Yakima Watershed Pesticide Round-Up in cooperation with the Yakama Nation Pesticide Program, Kittitas County's Solid Waste Program, Yakima County's Solid Waste Division, and Washington State University.

Pesticides accepted by WSDA include insecticides, herbicides, fungicides, rodenticides and most chemicals that kill, repel or prevent unwanted pests. Empty containers and other waste, such as fertilizers, motor oil and household hazardous waste, are not accepted for disposal by this program. For information on how to dispose or recycle these other items, contact your local solid waste department. In Kittitas County call (509) 962-7577, in Yakima County call (509) 574-2472, and in Benton County call (509) 942-7387. In addition, NW Ag Plastics, Inc. operates a free recycling program for empty plastic pesticide containers. Contact them at (509) 961-8524 or www.nwagplastics.com.

Leaky containers or improper pesticide disposal may create serious health problems for humans and animals, contaminate drinking water supplies or cause significant environmental damage. It is also very expensive and difficult to clean up contaminated soil or water. These problems can be prevented by proper disposal of pesticides that are no longer needed. WSDA will provide customers with supplies necessary to protect broken or leaky containers to ensure safe transportation to the collection site.

WSDA also provides a disposal opportunity for persons who are quitting business or selling property and are stuck with pesticides they will never use. In some cases, a storage room containing pesticides can delay a property transaction.

"We also hope to reach new property owners who may find barrels, bottles or cans of unknown substances left behind by the previous owner," said Joe Hoffman, WSDA disposal program coordinator. "A mystery container with unknown contents may be the most hazardous feature of your new property, especially if you have curious children or the container is leaking. We will help to identify the contents and, if it is a pesticide, we will arrange to have it removed at no cost to you."

Customers transport unusable agricultural and commercial grade pesticides to the collection site where WSDA takes possession of them and a hazardous waste contractor packs them for safe and legal transportation and disposal. WSDA oversees collection in cooperation with local agencies and businesses.

"We are responsible for the pesticides once we take possession of them," Hoffman added. "We become the owner of the pesticides before they are turned over to the contractor. Customer names do not appear on any manifests or disposal documents. That is significant because owners of hazardous materials are usually responsible for life for the cost of disposal or any environmental cleanup that may be needed should a transportation accident or disposal site release occur."

"We've been responsible for disposing of 1.5 million pounds of pesticides from all around the state," Mike McCormick, WSDA pesticide disposal specialist from Yakima says. "As a grower myself, I know there are pesticides no longer being used that farmers want to remove from their property. We also provide on-site assistance, when requested, or refer the person to another resource if he or she is unable to identify the materials or needs assistance in packaging or inventorying items."

WSDA has sponsored regional collection events at various locations around the state since the program began in 1988. To date, 4,667 customers have properly disposed of 1,500,227 pounds of waste pesticides.

In addition to calling or using e-mail to sign up for the Pesticide Round-Up, you may write to the Waste Pesticide Program, Washington State Department of Agriculture, PO Box 42589, Olympia, WA 98504-2589. For more information, visit WSDA's Web site at www.agr.wa.gov, then click respectively on "Pesticides & Fertilizers," "Pesticides," and "Waste Pesticide Program."
